SECURING TRUST

Specialists in Eavesdropping
Detection and Prevention
for government and business

Eavesdropping is increasing dramatically. ARE YOU AT RISK?

In a time where technology rules and information is power, the threat of eavesdropping and technical surveillance is real and immediate.

Your corporate information is a valuable asset to your business. The dangers of hostile intelligence gathering activities are often underestimated and consequently many organisations do very little to protect their sensitive information which can be of great value to an adversary, competitor, or to a disgruntled staff member.

The threat of information collection using electronic surveillance is not confined to secret agents.

Electronic eavesdropping devices are inexpensive, small and can be bought by anyone online or from 'spy shops'. They require very little technical knowledge and can be installed in minutes. It is easy to find instructions on the internet about how to construct and use them and this is leading to more widespread use of sophisticated surveillance devices and activities.

Whilst illegal in many jurisdictions, the motivation, cheap cost, ready access to reliable devices and components, together with the expectation that detection is unlikely, leads many people to be more than prepared and willing to use eavesdropping and technical surveillance techniques to obtain private and sensitive information.

The threat of information
collection using electronic
surveillance is not confined
to secret agents.

AssureCore helps you solve these problems:

- Privacy invasion via illegal eavesdropping, voyeurism and tracking;
- Industrial espionage;
- Intellectual property loss loopholes; and
- Intelligence gathering at off-site meetings.

OSCOR Green
State of the art spectrum analyser

Giving you peace of mind. ARE YOU PROTECTED?

If you are unsure if your information protection measures are effective to deal with the threat against you from competitors, staff and other adversaries, then let AssureCore assist you gain assurance.

AssureCore can help through:

Technical surveillance threat, vulnerability and risk assessments

AssureCore provides threat, vulnerability and risk assessments for a designated area or facility. These assessments aid in the development of a strategic counterintelligence plan (including TSCM services) that aim to minimise the loss of sensitive information from the threats of privacy invasion, industrial and economic espionage. The process begins with a briefing from the client about their immediate concerns.

Technical Surveillance Counter Measures (TSCM) Surveys

AssureCore provides advanced TSCM Survey services for government offices, law enforcement organisations, corporations, private individuals, celebrities, executives, conference rooms, hotel rooms, private or corporate vehicles, private aircraft or yachts.

TSCM Workshops and Awareness Briefings

AssureCore offer TSCM workshops and awareness briefings throughout Australasia. Customised TSCM training courses can also be provided.

Technical security engineering and pre-construction advice

AssureCore can assist in the selection of TSCM equipment and the design of facilities to enhance protection against technical surveillance activities.

Benefits of regular TSCM surveys:

Protect

- Sensitive communications
- Boardroom discussions
- Mergers and acquisitions
- Delicate negotiations
- Legal strategies
- Employee safety
- Trade secrets
- Personal privacy
- Vulnerable off-site meetings
- Executive residences and home offices

Satisfy

- Duty of care
- Fiduciary responsibilities
- Due diligence requirements
- Business secret status for court

Increase

- Awareness of threats to information
- Effectiveness of protective measures

Why AssureCore?

AssureCore was created to fill the need for a reliable, experienced and knowledgeable Technical Surveillance Countermeasures (TSCM) service provider for government and business in Australasia

Our people are accredited counterintelligence professionals with academic foundations in security management, electronic engineering, project management, technical security and human resource management. They each possess many years of practical, on the job TSCM experience across a diverse range of business, government and law enforcement environments.

We appreciate every organisation's protective needs are different. We also understand the multi-faceted nature of protective measures and the need to provide a holistic approach to keeping your people, information and assets protected. Hence, we work closely with our clients to design the most suitable and cost-effective range of protective measures for them.

We can manage an immediate crisis situation, or we can help to develop a long-term preventive strategy that will reduce risks.

We handle sensitive and confidential assignments with discretion.

Our advice is independent, unbiased and we do not have any secret affiliations with equipment service providers, nor do we accept commissions or try to sell you equipment.

We do not supply or install technical surveillance devices.

If you would like to find out further about how we at AssureCore can assist you to safeguard your sensitive and valuable information and protect yourself, your family and your business from eavesdropping, please contact us.

BE AWARE

If you suspect that you are subject to technical surveillance, please do not contact us from a telephone, computer or even discuss the matter in an area you believe might be targeted.
